REVENUE MODEL

1. Subscription : The hospital management system will charge a subscription fee from hospitals for using their software. The fee can be charged monthly, quarterly, or annually.

2. Licensing model: We will charge a licensing fee for using our software. The fee can be charged for each hospital, or it can be based on the number of users.

THANK YOU

We thank IGDTUW Resources and REIGN'23 for providing us with this wonderful opportunity. We as a team got to work on developing and designing a website (through coding) for the first time. Through this process we learnt a lot of new skills. We had our differences but we worked as a team to resolve various problems and coming out of this hackathon we feel a great sense of accomplishment <3
